Decisions Taken

The committee decided to forward a proposal to the Dept. of Physics in lieu of introducing another research centre attached with the Department of Computer Science based on the PG of Physics. Physics and Computer Science have many allied, interdisciplinary areas such as AI, ML and so on. These subjects are also included in both PG programmes of Computer Science and Physics. Hence based on this the department committee has decided to request the Dept. of Physics to consider this proposal. The proposal if approved will be forwarded to the Council and henceforth to the University after approval. The additional centre of research will also be an advantage to the college if approved. The college already has one research centre run by the Dept. of Physics.
