

Students Centric Learning  
Department of Botany  
Govt. College Kariavattom

The department of Botany fostering a dynamic learning environment that prioritizes student's centric learning activities. It is imperative to equip out students with knowledge that goes beyond textbooks and encourages them to engage actively in the world of Botany. In this department students are actively involved in this learning process. To achieve this the curriculum integrated with hand on experiments, field visit to botanic Gardens and interactive classes using audio visual aids.

Students actively participated extracurricular activities like kitchen garden programme; it provides an experience with nature and gardening and builds positive attitudes towards the agriculture in College students. In this programme they learned about Seed germination pattern, Seedling growth, agricultural practices, Plant disease cycle and Control measures of disease
