CATCH THE RAIN CAMPAIGN

**NATIONAL SERVICE SCHEME
UNIT 17 A & B**

Rainwater harvesting (RWH) is the collection and storage of rain, rather than allowing it to run off. Rainwater is collected from a roof-like surface and redirected to a tank, cistern, deep pit (well, shaft, or borehole), aquifer, or a reservoir with percolation, so that it seeps down and restores the ground water.

Rainwater harvesting provides the independent water supply during regional water restrictions, and in developed countries, it is often used to supplement the main supply. It provides water when a drought occurs, can help mitigate flooding of low-lying areas, and reduces demand on wells which may enable groundwater levels to be sustained. It also helps in the availability of potable water, as rainwater is substantially free of salinity and other salts.

In accordance with Rainwater harvesting, National Service Scheme unit 17 A & B of Government College Kariavattom, conducted ***CATCH THE RAIN CAMPAIGN*** through online mode via G meet. The chief guest of the programme was Sri. Anzar Azad (Modern rainwater harvesting expert, Managing director of Act Pvt Ltd, Tvm). The meet started with NSS song. Anzar Azad sir's valuable words made the session very insightful and informative. Felicitations were expressed by IQAC coordinator;Dr.Sabeen and NSS program officers of Government College Kariavattom. **75** participants attended the meeting.The participants got an opportunity to clear their doubts about rainwater harvesting through the interactive session.
