

Students Webinar Series (S³)-2020-21, Govt College Kariavattom

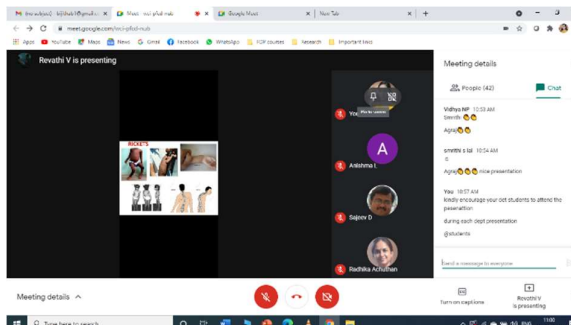

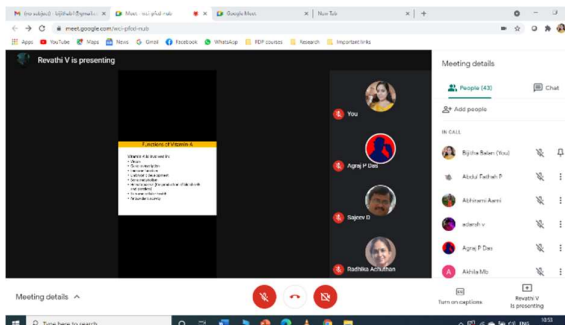

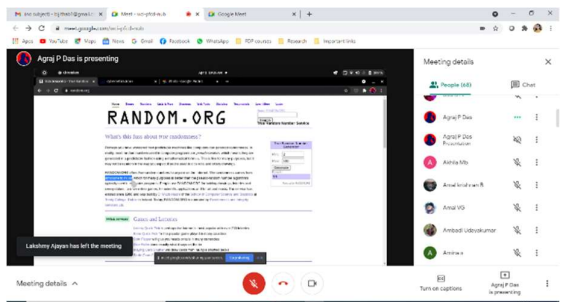

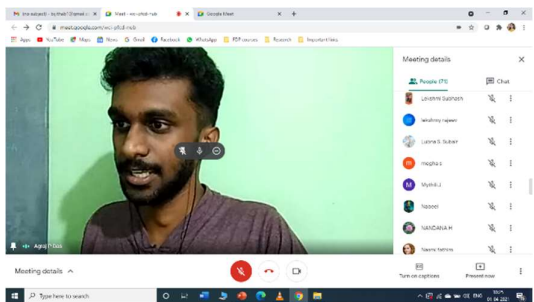

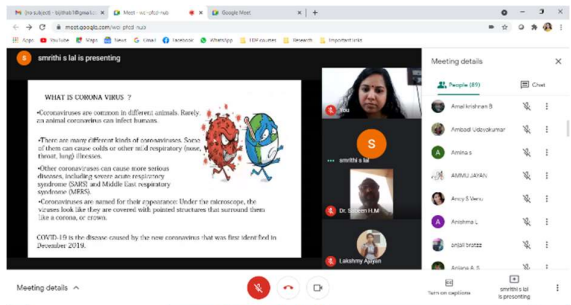

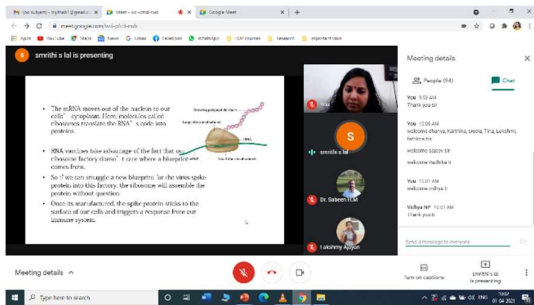

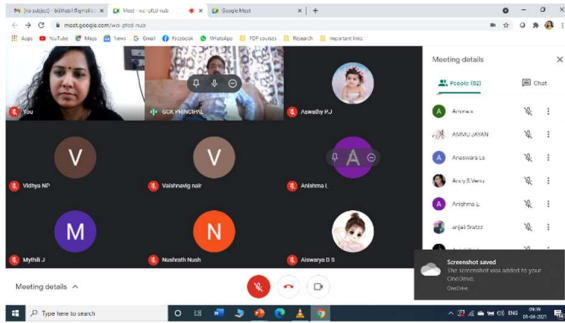

Academic Programme Committee (APC) in association with IQAC conducted student webinar series 2021. The overall aim of the student seminar series is acquirement of knowledge in a particular field and to help develop intersection of multi-disciplinary understandings of topics. Discussing in a common platform the relevant topics of the particular subject, students tend to learn about the latest information and new skills related to the concerned subject. Many good student speakers are available in different departments who can give a very good lecture on their topic of interest. Academic programme committee identified those student speakers and gave them an opportunity to deliver lecture to all the students in college. One student from each department gives a lecture on common topic of interest which will be open for the students and teachers of all departments. This platform provides an opportunity for a common interaction between students of all departments. There will be a mentor from each department who will assist the student to prepare the slides and presentation. The students are given certificate after the successful completion of the presentation.
